called to the memories of a number of older Iberia residents the pretentious place that village held in educational and cultural circles of the state 70 years ago.

WARREN G. HARDING, who was graduated from the Obio Central in 1882, attended during a period when the school was losing its prestige. A few years later came the lapse in its history as a school when it was turned over to the state for a working home for the blind.

In 1894, the old Ohio Central college building and the old dormitory building immediately adjacent were destroyed by fire with the exception of a part of the brick walls of the dormitory. The dormitory was rebuilt part of the burned walls and most of the foundation being left lutact. The college building never was rebuilt.

Charles C. VanAtta, 69, of Iberia, once a student in the college, who has been a member of the Washington township board" of education intermittently since 1897, recalls that the state turned the dormitory and the grounds to the board of education within a few months after the dermitory was rebuilt. It then became a grade and high school building, and for many years has housed the centralized grade school of

PLANS for its future are indefinite. Some members of the board are considering converting it into a garage to house the achool busses.

In the better days of its histery, the college and students rooming in the dormitory provided the nucleus of a number of literary socioties, which gave weakly programs to provide the popils with "elecutionary improvement and instruction in parliamentary usages." All students were required to take part in these programs. Programs of these affairs are among the possessions of Mrs. Engla Blair, 65, of east of Iberia, who attended the school part of the time while Mr. Harding was studying there, H. R. ### Dollar Wheat.

"Dollar wheat," agricultural equivalent of "the full conference to forcetall any such decisions. dinner pall" and "a chicken in every pot," is being heard in many a farm kitchen in the wheat prairies. By some it is taken seriously and by others it is had fortune of stogans that they can be used two ways: sincerely and carpingly.

Farmers in North Dekota will do more than wait for good times that will send the price of wheat up to the magic level. Those who believe it can be done will pledge themselves to hold their wheat until it can be sold for a dollar a bushel. When that time comes, if ever, they will sell only 10 per cent of their holdings in one month, to keep up the price.

An organization for this purpose has been formed it is reported. Farmers' pledges are filed with the board of township trustees in their respective regions and committees are organized to see that they ablde by them. It is the hope of the originators of the plan to make it appear attractive to farmers throughout the United States.

It is impossible to see success for this artificial means of raising the price of wheat-as impossible as it was to see success for the farm board plan of raising the price by limiting the quantity. Granting the possibility of complete cooperation in North Dakola, there still would be an unmanageable surplus elsewhere that would batter any artificial price structure to pieces. Pledges would be broken as soon as the price level climbed into the upper third of the dollar. Farmers needing money would have to dispose of their cropsearly.

When the farmer abandoned his self-subsistence policy and became a free lance producer he invited over-production and all its evils. Commendable as his offerts at cooperation have been, they have met with scant success, even in regions where he had the most to gain. There will be dollar wheat again, but it will be surprising if an agreement among wheat farmers to hold their crops has anything to

### Mussolini Does It.

Americans who have been yearning more or less secrelly for a dictatorship had two opportunities to see their idea in operation Wednesday, From Italy, seat of perhaps the world's most successful dictatorship, came the interesting news that the strong man at the top had gathered unto himself more strength by wholesale dismissal of ministers and undescoretaries. From Germany, which has been getting along under dicintorship in fact it not in name, came the significant announcement that the state of Prussia, scene of extensive political riots recently, would operate under a dictatorship indefinitely and that Berlin and the province of Brandenburg would be sohered down under the restraining influence of martial law.

There is little that is surprisig in either development. The whole world knows by this time that diclatorship is the sign of governmental emergency. Though better acquainted with the facts of the emergency in Germany than in Italy, it easily will come to the conclusion that Benito Mussolini, too, is having a taste of the trouble that plagues Paul von Hindenburg. The dermer has difficulty surprising the world; more than any other of the strong leaders he has established the right to be a powerunto himself. When Mussolini acts he does it with

This is dictatorship—the recourse of nations unable to govern themselves by the will of the people. This is the best system in existence for centralizing responsibility for the sake of efficiency when popular government has falled. This is the plan of government in which power exists in the military power of its chief. This is the government in which forgotten men must ask for permission to be remembered. ### Congress Saved a Billion.

Reduction of more than a billion dollars in approprictions for the fiscal year 1933 compared with 1932, assuredly is something of which congress may be proud. Naturally, lack of an opportunity to be been resented.

Senator Jones, chairman of the senate appropriations committee, and Representative Byrns, chairman of the house appropriations committee, speaking for congress, have done their best to correct a high prices. He is the fault, and his alone. All over difficult situation. Unfortunately, their effort comes at a time when there is no disposition in the hearts ing by the ship. That is the way we look at it, and

who admits the fact of his distrust and lays it aside for the moment to note the true proportions of the achievement will be impressed.

Senator Jones estimates a clear saving of \$1,007, it a little more-11,139,853,618. Either figure is of an ample proportion that will surprise the critical eye of the citizen who has been informed over and over again that congress is incapable of effecting real economies; that it makes the motions, juggles, the figures and spends the money eventually. As Senator Jones puls it:

I fear there exists in the minds of some of our citizens some distrust of congress. I hope every one of our people will weigh this matter (the saving in appropriations) carefully and with fairness in their hearts give due credit to their representatives in congress. . .

The senator may be assured that an effort will be made, but with what success it is difficult to predict. There is, after all, the distrust he mentioned. Unfortunately, it can't be dispelled easily.

### Burning Ears.

If the old belief has any truth in it, many American ears will burn continuously for the next month while this nation's manufacturers are talked about in the British sempire economic conference at Ottawa, Canada.

It will be easy to forget the burning, however, if the same cars are not saddened when the conference adjourns by announcement of decisions that will be more unfavorable to American trade with Canada than the previous action of the dominion in raising high fariff walls. Aleri negotiators of the type which doesn't welcome publicity will be on hand at the

Prospect of success for the stated sims of the delegales to the conference are not bright. The aims vary too widely; the distance between them is a little more than a bitter and bad joke. It is the warning that the empire's component parts have no more in common than so many compenent parts of the international family. Each is intent of bargaining to its own best advantage. All are suspicious of the motives of the mother country, which has the most to gain by empire trade and the least to

> The objective implied by the indefinite phrase, "empire trade," can not be reached by natural means. There is, for instance, the matter of steel. The conference will be asked to raise tariffs against United States steel to help British sleel. But Canadian users of steel, thinking of the inconvenience of buying steel on the other side of the Atlantic, will be sure to object. Buying it from Pittsburgh is satisfactory to them. Eurthermore, if tariff walls were to be relsed, it would be only a matter of time until United States steel manufacturers would be producing steel for the Canadian market in Canadian ter-

The Ottawa conference will be an international economic conference in miniature. Those who have placed faith in the latter scheme to straighten out the innumerable tangles of commorce will look closely for signs at Ottawa favorable to their projuct. Unless there is a decided upset in the losing struggle to strengthen the empire with exclusive trade, they will be disappointed.

### Steve Stanley, Gypsy.

One wonders how the gypsy rank and file feels about the progress platform of their new king, Steve Stanley, up-and-coming graduate of New York col-

King Steve stands unequivocably behind a policy of modernization with gypry young people crowding into the trades and professions, attired in sober American dress and, figuratively, waving the stars and stripes forever. As a start, he has ordered his subjects to cense the old Romany custom of selling spots. This appearance is often' In kidney diseases, the moisture marriageable daughters to the highest bidders,

It seems the part of wisdom to write King Steve down at the outset as a young man riding for a fall. Either he is wrong to his last ideal or all explanations of the force that has impelled gypsies to travel farther to see what lives over the next hills have been wrong. Even so, there will be no inclination to deny some admiration to any youthful gypsy monarch who dares to desire for his rouming people the same regularity which enabled him to stay in one place long enough to get an education. It will be interesting to keep track of the highights of his career. The next one may be a repudiation of his platform. Or aren't gypsics like Republicans and Democrats?

Women will talk, and so will men, if you are so careless as to offend with unpleasant body odor... or with a highly scented soap, But why take chances? Bathe with Kirk's Coco Castile and your skin and scalp will be as fresh and clean-smelling as a woodland breeze. Made of 100% pure cocount oil. Kirk's Coco Castile gives a fuller, more penetrating lather than ordinary soaps, goes deep into the pores, removes every trace of dirty, oily film. Best of all, it's unscented; leaves no telltale hospital smell. You'd expect it to cost more than ordinary soaps. Actually it costs much less. Of the 4 leading toilet soaps, Kirk's is half again larger, yet the price is the same. Try it today—for hands, for bath, for a wonderful shampoo. You'll be amazed at the difference. Avoid imitations. Look for the arrows. Always ask for Kirk's by name.

# My Beauty Hint

BY JANET/GAYNOR TO keep my complexion good I I use a honey treatment

night and morning. I cold cream my face, rub, it in and remove it with soft cloth. Next I wash my face with soop and warm water.

Then I apply the honey and pat it in for five minutes. Next I wash it off with cold water and apply an astringent. The honey removes impurities and leaves my skin in excellent condition.

SOME NEWS is cheerful. The Akron, O., increases wages 20 per cent, to make up for a similar cut In January. Employes were told that if they made the concern profitable wages would come back. They did it, working six hours a day, six days a week. The management says the increased leisure, freedom from factory monotony enjoyed by the men accounts for an unusual production record.

Other employes might consider that. The five-day week, demanded by the Federation of Labor with an eight or even six hour day make that necessary, may be run as the old long week and day with tired workers.

He also pointed out as an encouraging sign, the changed attitude of merchants who have settled down to a more thoughtful operation of their business.

When prosperity returns, the speaker declared, it will not be through any act of congress but through the restoration of confidence in the minds of the people. It will not be accompanied by any blaze of glory, he contended, but will arrive slowly and for that reason will be more stable and lasting.

There are about two hundred Americans in Paris awaiting asacross the Atlantic is sistance either from home or the vioping & distinct class authorized American agencies genteel hobos who here. As rapidly as funds are available through the American organizations, the indigent are returned home third-class.

The greater part of these 200 are American women between 20 and 30 years of age. The majority of them are of the socalled "artistic type." They may be seen cracizations in Paris to en- nightly about the two principal rendezvous of Bohemians in Paris, the Dome and the Select brasseries in the Latin suarter.

> They sleep the greater part of the day, to save expense and later drop down at a table outside one of the brasseries for a cup of coffee. They will sit for hours at the table eying all passersby, hoping to recognize an acquaintance or visitor from home.

A visitor is always glad to see a home-town girl so far away and he immediately wants to celebrate. His joy is as nothing compared to the enthusiasm of the young woman. This happy incident means visitor takes passage for home. Once the visitor has departed,

tance begins all over again. Americans who live in Paris have little patience with these improvident young American women, and few residents will loan or advance them money, for it is, they have found through experience, the same hardluck story next month.
